Quantum Systems honored as a Top 10 company at the Ukraine Recovery Conference 2024

Berlin, 11.06.2024 - Quantum Systems has been recognized as one of ten international companies honored as a Flagship Project of International Business in Ukraine at the Ukraine Recovery Conference (URC) 2024. The award will be presented by Federal Minister for Economic Affairs and Climate Protection, Robert Habeck, alongside his counterpart, Yuliia Svyrydenko, First Deputy Prime Minister and Minister of Economy. Quantum Systems is one of only three German companies to receive this honor at this year's URC, which will be attended by German Chancellor Olaf Scholz and President Volodymyr Zelenskyy.

As part of the Ukraine Recovery Conference 2024, Germany and Ukraine have initiated the "Flagship Projects of International Business in Ukraine" program. This initiative aims to highlight exemplary economic engagements in Ukraine and to encourage further investment. Quantum Systems has been positioned as the German defense company of URC 2024 with its unique local commitment. Since the start of the war, the European drone pioneer has been active in Ukraine with its Vector reconnaissance drones. By the end of the year, 500 systems will have been delivered to Ukraine, with a further 800 additional Vector reconnaissance drones requested for 2025.

Under the motto "Deliver, Support, Integrate," Quantum Systems has expanded its presence with two locations in Ukraine. In 2023, the company opened a Service, Support, Training & Logistics Center (SSTLC) in Ukraine, which includes a repair workshop, an R&D hub, and a training facility. In April 2024, Vice Chancellor and Federal Minister Habeck, together with the Minister for Strategic Industries, Oleksandr Kamyshin, inaugurated a factory in Ukraine where 100 Ukrainian employees will manufacture up to 1,000 drones per year.

Quantum Systems is currently focused on supporting Ukraine in its defense against Russia. As a dual-use company, it is also prepared for future needs. Quantum Systems' drones can be rapidly and easily deployed for civilian reconstruction tasks, including battle damage assessment, environmental damage assessment, surveying, and agricultural purposes.

This broad commitment to Ukraine will be honored at the Ukraine Recovery Conference 2024. Sven Kruck, Managing Director and CRO of Quantum Systems, stated: "We have stood by Ukraine's side since the beginning of the invasion. True to the conference motto "United in defense. United in recovery.", our drones are making their contribution to the defense of Ukraine today. Beyond the war, they will contribute to the reconstruction and well-being of Ukraine."

Oleksandr Berezhny, Managing Director of Quantum Systems SSTLC Ukraine, commented: "As the Ukrainian Managing Director of a German company in my home country, I am proud to receive a special honor for Quantum Systems at URC24. We will continue to make our contribution to the defense of Ukraine and look forward to the close and long-term cooperation between our two countries."

As a dual-use company with around 250 employees, Quantum Systems currently manufactures products for both the civil and public sectors at three locations. The production facility in Ukraine is the fourth plant among a total of seven locations worldwide.

About Quantum Systems

Quantum Systems specializes in the development, design and production of small unmanned aerial systems (sUAS). The company's electric vertical take-off and landing (eVTOL) aircraft are designed for maximum flight endurance and versatility, providing users with a seamless user experience. By integrating cutting-edge software capabilities such as edge computing and real-time AI-powered data processing, Quantum Systems builds next-generation UAS for security, defense, public safety, commercial and geographic operations customers across Europe.

Founded in 2015, Quantum Systems is headquartered at Oberpfaffenhofen Special Airport, 20 km west of Munich, with offices in the USA, Australia and Ukraine.
