Vitali Klitschko receives Quantum Systems donation of 100 Trinity™ drones to Ukraine

The Mayor of Kyiv took possession of a donation of 100 mapping drones by German manufacturer Quantum Systems. The equipment will be used for the reconstruction and recovery of Ukraine and is configured for various disaster relief, damage assessment and surveying missions.

Kyiv, Ukraine – July 31, 2024 – Quantum Systems, Europe's leading innovator in dual-use drone-robotics offering state-of-the-art multi-sensor technology for both government and commercial clients, announces the donation of 100 mapping drones to the Mayor of Kyiv, Vitali Klitschko.

The donation was promised by Quantum Systems CEO and founder, Florian Seibel and made possible by the German charitable foundation, [#WeAreAllUkrainians gemeinnützige GmbH](#), who is forwarding the Trinity drones to the [State Border Guard Services of Ukraine](#).

The Quantum Systems Trinity drones are equipped with a Sony RGB camera and used for mapping and surveying. They will aid Ukraine in environmental damage assessment and battle damage assessment as well as in surveying and mapping critical infrastructure and terrain. The drones can provide crucial data and information to support during reconstruction and recovery as well as for humanitarian relief.

"We will not only send our Trinity drones but true to our motto "deliver, support, integrate", we will support their operation with repair and maintenance at our facilities in country and we will train the operators of the Ukraine Border Guard. We are committed to Ukraine in its struggle for independency and beyond," said Sven Kruck, Managing Director of Quantum Systems.

The first shipment delivered on July 30th contains 28 Trinity drones. The remaining deliveries are expected to be concluded by the end of the year. As an extension of the donation, Quantum Systems LLC in Ukraine will support these systems in the field and will provide repair and maintenance services. Quantum Systems Service, Support, Training & Logistics Center (SSTLC) will train operators of the State Border Guard Services of Ukraine.

Vitali Klitschko, Mayor of Kyiv, said: "Border guards will use the equipment to organize control of Ukraine's borders and respond to various challenges. As well as to survey and map the infrastructure. SSTLC instructors will train border service personnel after the first batch is delivered and will be responsible for all support, training and logistics activities."

About Quantum Systems

Quantum Systems specializes in the development, design, and production of small Unmanned Aerial Systems (sUAS). The company's range of electric vertical take-off and landing (eVTOL) sUAS are built to maximize range and versatility and provide operators with a seamless user experience. By integrating cutting-edge software capabilities like edge computing and real-time AI-powered data processing, Quantum Systems is building next-generation UAS for clients in defence, security, and the public sector.

Quantum-Systems is a global company, founded in 2015 and headquartered at Special Airport Oberpfaffenhofen, 20 km west of Munich, with business locations in the United States, Australia and Ukraine.
