Quantum Systems partners with Frontline to integrate cutting-edge C-UAS capabilities

The two companies in the defense technology sector have announced their collaboration to address the challenges posed by modern warfare

Kyiv, Ukraine – April 14th, 2025 – Quantum Systems, the German-Ukrainian leader in unmanned aerial intelligence solutions, today announced a strategic cooperation and investment agreement with Frontline, a Ukrainian company specializing in military robotic systems. This cooperation marks a significant step in Euro-Ukrainian defense industry integration.

The agreement was signed on April 9th under the chairmanship of the Minister for Strategic Industries, Herman Smetanin, and is focused on integrating Frontline's counter-unmanned aerial system (C-UAS) solution into Quantum Systems' unmanned aerial systems (UAS). This C-UAS capability is based on a deep understanding of modern warfare and is intended to be a component of the Quantum Systems Vector AI reconnaissance drone and other Family of Systems drones.

“Our cooperation with Frontline is a strategic leap forward, not just technologically, but industrially,” said *Oleksandr Berezhny*, Managing Director of

Quantum Systems Ukraine. “As a German-Ukrainian company, we are proud to invest in and integrate with Ukraine’s top MilTech innovators. This is about building systems in Ukraine, for Ukraine — and for the future of European defense.”

Frontline is a Ukrainian Defense technology company founded in August 2023 by four Ukrainians. Since 2014, its founders have developed a series of robotic solutions for the Armed Forces of Ukraine, which have been deployed in the field and are successfully in use. The company is currently focused on developing a set of interconnected aerial and ground robots that provide unmanned superiority on a specific tactical area up to 15 km deep.

“We are excited to join forces with Quantum Systems and bring our technologies to a broader operational framework,” said *Yevhenii Tretiak*, CEO Frontline. “This partnership is a powerful vote of confidence in Ukraine’s defense industry — and in our ability to deliver world-class capabilities that are built for the realities of modern warfare.”

The collaboration was formalized through the signing of a Memorandum of Understanding on Wednesday, April 9th, 2025, at the Ministry of Strategic Industries of Ukraine. The document was signed by Quantum Systems Co-CEO Sven Kruck and the Managing Director of Quantum Systems Ukraine, Oleksandr Berezhnyi, and by Frontline CEO Yevhenii Tretiak and CTO Pavlo Kosolapkin.

The signing ceremony was chaired by the Minister for Strategic Industries Herman Smetanin and Representatives of the German Embassy in Ukraine. “The signing of the Memorandum with a Ukrainian company is another step toward deepening the integration of the German company into Ukraine’s defense industry,” the Minister noted. “I am grateful to Quantum Systems for their interest in cooperation and for the concrete steps and results achieved. Our collaboration significantly strengthens the defense sector through the introduction of cutting-edge technologies and the enhancement of existing systems. I am pleased that Ukraine’s defense industry has such a strong and consistent partner. Our partnership is mutually beneficial and already delivering tangible results. I am convinced this will serve as an incentive for other defense companies around the world to come work in Ukraine, in cooperation with our enterprises,” said Herman Smetanin, Minister for Strategic Industries of Ukraine.

The strategic investment increases Quantum Systems' presence in Ukraine through its local subsidiary *Quantum Systems LLC*, which functions as a fully Ukrainian company. As part of its long-term plan, Quantum Systems is growing local production, creating jobs, and integrating with Ukrainian defense institutions and innovators.

About Quantum Systems

Quantum Systems is at the forefront of AI-powered aerial robotics, developing a family of smart systems that go far beyond traditional drones. Our advanced electric vertical take-off and landing (eVTOL) small Unmanned Aerial Systems (sUAS), combined with our Drone Port solution, are designed to deliver automated actionable aerial intelligence. Built on a foundation of in-house software and AI, our systems transform aerial data into critical insights, empowering decision-making across security, defense and public safety, as well as for the commercial, industrial and GIS sectors.

Featuring cutting-edge technology like edge computing and real-time AI-driven data processing, Quantum Systems enables operators to make informed decisions with unmatched speed and precision. Our solutions bring aerial intelligence to your fingertips, automating the entire process—from deployment to data analysis.

Founded in 2015 and headquartered at Special Airport Oberpfaffenhofen near Munich, Quantum Systems operates globally with locations in the United States, Australia, Ukraine and Romania. Our German-engineered technology is trusted worldwide, paving the way for a new era of data-driven solutions.
